InTraDev Afrique

Clean Energy Solutions

Your Trusted Partner for Renewable Energy Solutions

InTraDev

Clean Energy Solutions

An Initiative of IntraDev Afrique

01

Overview

InTraDev Clean Energy Solutions is an initiative of InTraDev Afrique, offering Solar Photovoltaic (PV) projects to the commercial, agricultural, and domestic market segments. With support from the parent company & our business partners, we bring you an unparalleled experience in designing and installation.

We strive to create cost-effective solutions with efficiency and performance for sustainable energy sourcing to meet our clients' needs across West Africa. With headquarters in Accra, Ghana, InTraDev Clean Energy

Solutions services and supports clients across Ghana and West Africa.

Our qualified specialists provide professional, expert service, and we deliver quality materials at competitive pricing because, for us, these things go hand-in-hand. We offer some of the longest warranties in the industry because our

products stand the test of time. We take pride in what we do, no matter the size of the job – the important part is that we help you take back control of your power supply and protect you against rising costs so you can spend your money on what matters most.

Our Vision

To be your trusted partner for renewable energy solutions

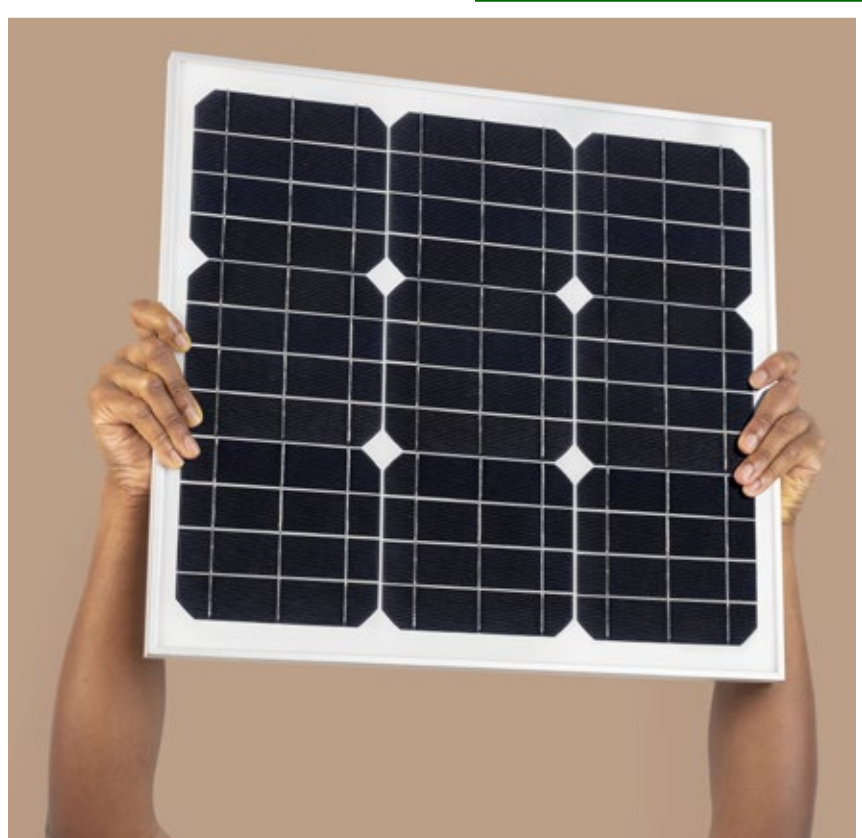

Our Mission

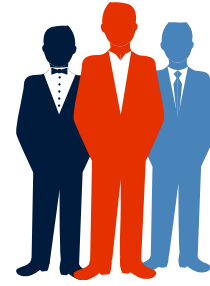

- To provide tailor-fit solutions for industrial, commercial, and residential customers through our in-depth understanding of energy consumption behaviors and strategic partnerships with world-class technology partners.

- To provide clean energy infrastructure to support local electrification and grid access to enhance people's standard of living

03

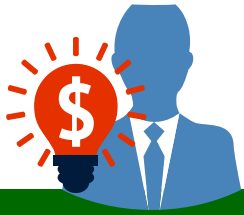

Why Choose Us?

Making a Sustainable Difference!

We strive to build a sustainable future and pave the way for growth, demonstrating unmatched excellence, integrity, and constant development.

Unprecedented Pre-Sales Support

Our team of experts makes sure to support; our customers throughout their journey of switching to Solar. From educating about the benefits of Solar Energy to advising about the best solution for them, we help our customers secure the best value for their money.

Constant Development

Providing better value to our customers by continuously improving quality and service is in accordance with our futuristic approach toward business. We support the free flow of ideas and creativity and constantly focus on unconventional thinking.

Innovative Solutions

InTraDev Clean Energy Solutions delivers the highest energy production, high performance, and unmatched reliability. We make sure that you get total control and visibility over your energy use.

05

Projects Financing

When it comes to project financing solutions, we offer our unprecedented support and guidance all along the way. Our experts help clients agree with the funding companies to ensure smooth funding processing and repayment.

After-Sales Support

Our after-sales support team keeps in close contact with our customers to ensure that their system runs smoothly.

Energy Audit

Our team of experienced professionals assesses your Solar Energy requirements free of cost as part of our energy audit. It helps us analyze your energy flows to identify; all possible opportunities to reduce your Carbon Footprint and energy expense.

Our Partners

Panasonic

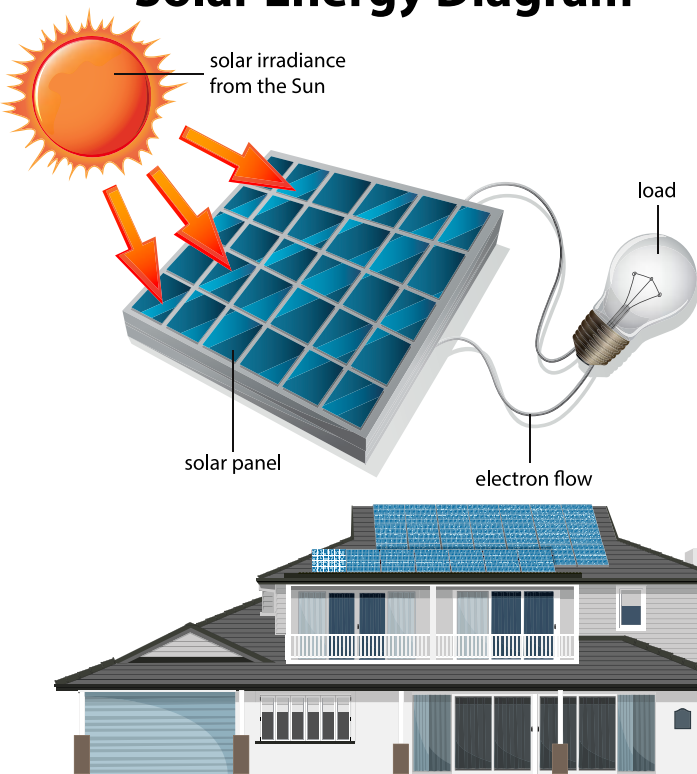

Honeywell

Renewable Energy

Our pioneering spirit and technical expertise over the years have made us a leader in the clean energy sector. By harnessing the true potential of renewable resources, we are committed to addressing diverse energy needs. We leverage the power of wind and solar to design and deploy sustainable solutions.

Solar Energy Diagram

07

with an installed capacity of 5 megawatts and above. Through the solar power plant, you will be able to harness the power of the sun to generate clean electricity and supply it to the national grid.

Project Development

We conduct site evaluations and feasibility studies to assess your project's viability. Our services include providing initial proposals and consultations and ensuring thorough planning and sustainable project progress.

Financing & Investment

We assist you in exploring innovative financial solutions to support the development of your solar project, enabling it to generate substantial electricity while ensuring its bankability.

Design & Engineering

Your clean energy system is designed to maximise energy generation and ensure a favorable return on your investment.

Compliant Submission

We have the expertise in managing tenders and submissions that

meet all the necessary criteria and guidelines mandated by the relevant authorities. This is crucial to ensure the successful acceptance of applications without any issues.

Project Management

Our effective project management

ensures that your projects are finished on schedule, within budget, and to the desired quality standards.

Strategic Procurement

We are experts in sourcing products from both global and local suppliers for your projects, aiming to maximise the value of your investment while staying within your budget.

09

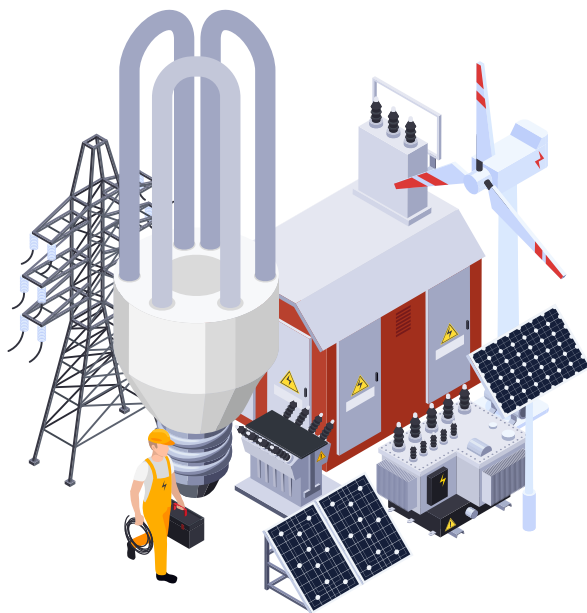

Construction & Commissioning

We ensure the successful project implementation, with a focus on verifying functionality, performance, and safety, and promptly addressing any issues or deficiencies to meet specifications before the project becomes fully operational.

Operation & Maintenance

We are expert in managing and sustaining the functionality, performance, and reliability of your assets, prevent downtime, ensure safety, and maximise the return on your investment. This is crucial to prevent downtime ensure safety and longevity of your assets.

2. Commercial & Industrial Solar

InTraDev Clean Energy Solutions specialises in delivering solar PV systems for commercial and industrial businesses, harnessing solar energy to provide maximum

financial benefits to your business. Explore the advantages of a customised rooftop solar PV system and solution to significantly reduce your high utility bills, cut operational expenses, and ultimately boost profits!

3. Residential Solar

We offer a suite of solar solutions for your home. The choice is yours. As you live, work, and play, you need electricity for so many things: your smartphone, lighting, and cooking. Where else to obtain it cheaply from but the sun? With InTraDev Clean Energy, you may stretch your expenses by reducing your electricity bill. You may even

11

sell the solar energy generated from your home to other consumers, thus ensuring additional income for you.

4. Energy storage solutions (ESS)

Energy Storage Solutions (ESS) is a foundation technology we employ when delivering sustainable energy solutions that provide our customers

with a host of benefits. Our experience with energy storage solutions or battery storage systems includes a range of industries and project types, from residential and education to manufacturing and hospitality.

Our ESS solution provides comprehensive, turnkey construction, from concept to operation and maintenance, including:

- **Site Survey**
- **Permitting and Finance**

- **Energy Performance Contracting**
- **Operations and Maintenance**

5. Build-Operate-Transfer (BOT)

Under the Build-Operate-Transfer (BOT) contract, we provide and install renewable energy and include an operating service package. The setup usually remains the property of the customer, and they purchase the electricity produced. They take over operations of the setup after a pre-arranged span of time
